alot of potential, fun concept

http://nobledroidgaming.com. This is one of the rare horror indie adventure games on Steam that is actually well worth its asking price. There are a lot of choices on Steam for this type of a game, and while I livestreamed this entire game in a single sitting on its launch day here on Steam, it was a very fun and gripping game experience.

I love the HP Lovecraft style of story woven in that you will gradually uncover until the dramatic and satisfying final ending scene. The game has a really well imagined and thought out plot and sequence of how you uncover the secrets within waiting to surprise.. and shock you.

While I've played a good number of these type of games, this game did make me jump at several points, and even had me screaming to hold on to my life as death itself tried to chase me down. ..If only I can run just a little fasterrrr! Runnnnnn! Awesome and exciting moments for sure! ..Mix that with a well imagined and good story that you discover as you explore this beautiful world and you have one helluva game for a small price tag!

Not without faults, this game hard crashed on me 15 times on its launch day, but thankfully the game does frequently auto-save often, and these autosaves take no time at all, and do not make you wait, so neither crash or death in the game will set you very far back. Already on just the day after launch, this single developer has already patched the game to fix the crashes, so this is VERY impressive and a quick response to criticism and bugs within his game. For a developer to respond so quickly and professionally is pure delight and all the more reason I recommend this game and hope that he does very well with this title! I also look forward to any future titles he might bring to Steam with this title and professionalism shown already. Love it!

My score for this game, even with it's minor faults is a strong 8 out of 10. Beautiful graphics, gripping and very enjoyable story make this a high recommend for anyone who likes these types of games.. The third and conclusive part. The final of a trilogy, based on the universe of Aliens.
7\/10. Love playing this game with my daughter, nice humorous puzzle platformer game with interesting concept and cute characters with some rude behavior :P

My daughter will sit for hours playing the game solving the puzzles and laughing at the cut scenes, good clean fun :D. This is a solid one. The dev is still active and the recent update allows you to play to the end and adds 6 bosses. I love it. I'm really looking forward to it being finished. A game worth supporting.. I love dungeon game style but it's make me fun in a short times so it's worth in "Steam SALE" price.
V\/V good for who love <micro troops and units>. Lacking in content, but pretty intense and decent graphics. Nice warm-up game before a proper VR workout.

This game made my cat killed itself.

26/4. why the game always sayin my steam is unlinked with the game? i alr login via the shift+tab overlay but the system still said my steam is unlinked. The mechanics are clunky, visuals are primitive and pacing is terrible..

A deceptive little game which looks like it's going to be easy and ends in a pile of skeletons.. I played this game before the patch, and i was disapointed with the story telling, the ugly UI and some scenaries but yesterday i had the chance to play the new patch and i said "jesus what a great changes those guys made", everything is like i expected, it\u00b4s like if it were other game.. Reinstalled CoH1 in a Jiffy!
